- RENTAL

ENSOL, the renowned name in Solid Waste Management System, now offers the all new, time and cost saving, low maintenance, **D.P. System**.

The **D.P. System** is custom made so as to snugly fit onto HCV/LCV chassis, making it very useful for garbage collection, using standard waste bins as a part of relay system.

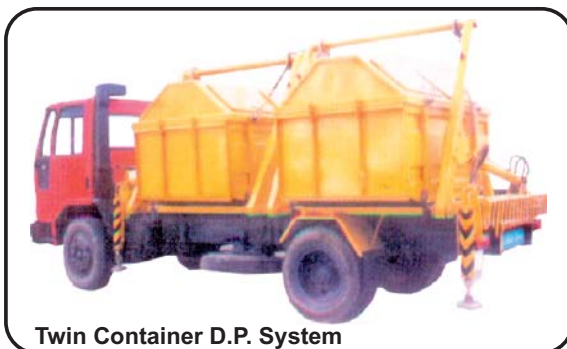

SALIENT FEATURES :

The **D.P. System** consists of hydraulic container / bin lifting arrangement sturdily designed lifting arms. The 'Simple to operate' controls can be manned even by unskilled personnel. All these features combine to give larger volume garbage transportation, using the 'relay' system wherein the **D.P. System** puts in an empty container in place and take away the one which is full to the dumping area for unloading. Obstruction to traffic and pedestrian movement is also kept to the desired minimum.

D.P. System is custom made in capacities depending on gross vehicle weight (GVW) and size of waste containers i.e. 2.5, 4.0, 4.5, 7.0 & 7.2 cub. mtrs.

APPLICATIONS :

- ◆ For safe and hygienic collection, storage and transportation of garbage.
- ◆ For quick and efficient lifting, transportation and unloading.
- ◆ For Multi point 'pick up' application of system through standard waste containers.
- ◆ Suitable for handling both Solid and Liquid material.
- ◆ Continuous 'relay' system achieving large volume of garbage transfer.
- ◆ Suitable for secondary waste collection from lanes using container 'relay' system.

Twin Container D.P. System

ADVANTAGES :

- ◆ Easy to operate as no special skill is required.
- ◆ Quick and efficient lifting, transportation and unloading.
- ◆ Popular system-low capital cost.
- ◆ Ideal for multiple point collection system with low operation cost.
- ◆ Very low maintenance cost.
- ◆ Modern equipment to increase dignity of labour.
